

IMPROVING ACCESS TO HEALTH CARE AND CONTAINING COSTS

"NPs in Florida explaining the health care crisis to our legislators and the need for NP autonomy"

If you are interested to see what our state NP organizations have put together to help our legislators understand the health care crisis in our state and how NPs are a major part of the solution to the problem, please read the attachment. This "white paper" is being used along with the video created by the Coalition (FNA) to help NPs gain access to more autonomy in our state including prescriptive authority. This may also be an important document to share with physicians you work with when trying to convince them to support us when trying to change legislative and regulatory issues present today.
